Sample 6G KO Blend Disposable Vape - Trainwreck (S)

Sample ID	SD230829-025 (83475)	Matrix	Concentrate (Inhalable Cannabis Good)
Tested for	Trinity Hemp Manufacturing, LLC		
Sampled -	Received Aug 28, 2023	Reported Aug 29, 2023	Unit Mass (g) 6.0
Analyses executed	CANX, QARUSH		

Laboratory note: The estimated concentration of the unknown peak in the sample is 6.08%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-)D8 Concentration is estimated to be: 54.72%

CANX - Cannabinoids Analysis

Sample 6G KO Blend Disposable Vape - Mendo Purps (I)

Sample ID SD230829-020 (83470)

Tested for Trinity Hemp Manufacturing, LLC
Sampled

Received Aug 28 2022

Matrix Concentrate (Inhalable Cannabis Good)

Reported: Aug 30, 2022

Unit Mass (g) 6.9

Laboratory note: The estimated concentration of the unknown peak in the sample is 3.67%. Currently Phamlabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)-d8-THC or d9-THC. At this time there are no reference standards available for (+)-d8-THC. (+)-d8-THC is a different compound from the main (-)-d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)-d8-THC and d9-THC is problematic for the scientific community as a whole. Phamlabs believes the unidentified peak to be a combination of (+)-d8-THC and d9-THC with the majority, if not all, of the concentration being (+)-d8-THC. Total (+/-)-D8 Concentration is estimated to be: 43.05%.

3421 Hancock St, Second Floor, San Diego, CA 92110 | License: C8-0000098-LIC
ISO/IEC 17025:2017 Accredited L17-427-1 #85368

Sample 6G KO Blend Disposable Vape - Chemdawg (S)

Sample ID	SD230829-016 (83466)	Matrix	Concentrate (Inhalable Cannabis Good)
Tested for	Trinity Hemp Manufacturing, LLC		
Sampled -	Received Aug 28, 2023	Reported Aug 29, 2023	Unit Mass (g) 6.0
Analyses executed	CANX, QARUSH		

Laboratory note: The estimated concentration of the unknown peak in the sample is 6.55%. Currently PharmLabs laboratory can not confirm an unidentified peak in your chromatogram due to interference (only with highly concentrated D8 products) from which we believe to be either (+)d8-THC or d9-THC. At this time there are no reference standards available for (+)d8-THC. (+)d8-THC is a different compound from the main (-)d8-THC cannabinoid and, therefore, these two compounds may have different efficacies. Using the most advanced instruments and techniques available, the separation of (+)d8-THC and d9-THC is problematic for the scientific community as a whole. PharmLabs believes the unidentified peak to be a combination of (+)d8-THC and d9-THC with the majority, if not all, of the concentration being (+)d8-THC. Total (+/-)D8 Concentration is estimated to be: 56.47%

CANX - Cannabinoids Analysis

Analyzed Aug 29, 2023 | Instrument HPLC-VWD | Method

The expanded Uncertainty of the Cannabinoid analysis is approximately 7.806% at the 95% Confidence Level
